MOHAMMED SAHAD SALIM

Creative Technologist | Generative AI Pipelines · AI Video · Brand Design

Kochi, Kerala · Open to remote · Notice: 30 days (negotiable) · +91 9544071381 · mohammedsahad4646@gmail.com · LinkedIn · GitHub · Portfolio

SUMMARY

Creative designer and video editor with 5+ years of freelance and agency work (since 2021), who also builds the AI systems behind creative production. Designed campaigns for 15+ hospitality brands at a Dubai agency, and for 8 months have built a production generative pipeline at an AI ad-tech startup: product URL → concept slate → director prompts → AI images and Veo video → published to Meta and Taboola. B.Tech CSE (AI & ML).

EXPERIENCE

AI Developer & Designer, Nativize (AI-native ad-tech startup) Feb 2026 – Present

- **Creative agent pipeline.** Built the agent flow that turns a product URL into marketing angles, a concept slate, director prompts and an image analyzer, then exports a finished page with images and video.
- **AI video generation.** A durable Veo video job scheduler, so video ad creatives are generated as background jobs that survive retries and failures.
- **Multi-model generation.** Claude for copy and creative strategy, Gemini for images with OpenAI as automatic fallback, Veo for video; structured outputs and tool calling throughout.
- **Ad publishing automation.** Creatives published through the Meta Graph API (campaign → ad set → creative → ad), created paused and resumable on retry, with a copywriter prompt audited with measured checks; Taboola campaign management with an automated CPA/ROAS rules engine (dry-run, daily cap, audit log).
- **Production quality.** Role-based access and Row Level Security on 39 tables, ~500-case regression suite, CI deploys, and failure handling that halts a batch when a provider runs out of credit.

Creative Designer, Means Design, Dubai, UAE Sep 2025 – Jan 2026

- Designed brand campaigns for 15+ hospitality clients in a 5-person team, delivering 100+ on-brand assets on deadline.
- Produced Instagram Reels and other short-form video edits alongside the brand work.

Freelance Designer & Short-Form Video Editor 2021 – Present (part-time)

- Brand design and short-form video (Instagram Reels and other formats) for clients, edited in Premiere Pro, After Effects, DaVinci Resolve and CapCut, with AI video and voice tools (Runway, Kling, ElevenLabs).

UI Designer (Part-time), Webcurve, Kochi Mar 2024 – Dec 2024

- Designed 50+ Figma screens and components, working directly with engineers.

PROJECTS

Quant Suggest: agentic AI platform for trading-strategy research Python, FastAPI, Next.js, PostgreSQL

- Claude turns a plain-English strategy idea into a validated spec, generates code restricted to verified methods, then passes a scenario gate and up to 3 automatic repair attempts before any backtest runs.
- In-house backtest engine: a 13-year run in ~4 s vs ~90 s on LEAN, cross-checked against LEAN (19 of 20 trades matched); CI over 640+ tests.

Game-Based E-Learning Platform for Children with ADHD using Deep Learning TensorFlow/Keras, OpenCV, React

- A CNN-LSTM classifies webcam frame sequences into engagement, boredom, confusion and frustration; detected states trigger short cognitive mini-games.

SKILLS

Creative & video: brand and campaign design, short-form video (Reels), Premiere Pro, After Effects, DaVinci Resolve, CapCut, Figma, Adobe Creative Suite

Generative AI: Veo, Runway, Kling, ElevenLabs, Gemini and OpenAI image generation, prompt design for image and video

AI agents & automation: Claude, Gemini and OpenAI APIs, agent pipelines, tool calling, structured outputs, multi-model routing and fallback, n8n, background job schedulers

Ad platforms: Meta Graph API, Taboola Backstage, GoHighLevel

Engineering: Python, FastAPI, TypeScript, React, Next.js, Node/Express, PostgreSQL, Docker, GitHub Actions CI/CD

Languages: English, Malayalam, Arabic

EDUCATION

B.Tech, Computer Science & Engineering (AI & ML), Sree Buddha College of Engineering, Alappuzha · CGPA 8.38 2021 – 2025
